

Company Introduction

No More Problems With Solutions.

If water analysis is your responsibility, your first analysis should start with CHEMetrics' self-filling reagent ampoules. These extraordinarily simple *snap-and-read* test kits actually have a lower cost per test than the labor-intensive versions you may be using now. Measured either instrumentally or by visual color comparison, you can have accurate, reliable, quantitative results for over 45 analytes in just two minutes or less.

No Mixing. No Measuring. No Mess.

Traditional methods often require sample and reagent preparation, multiple steps, and clean up. With the CHEMetrics systems, you simply immerse the ampoule in the sample, snap the tip, and quickly obtain dependable results.

Fewer Steps Means Fewer Errors.

Because test preparation is virtually eliminated, our products reduce potential operator error. That saves retesting time and money. And CHEMetrics' vacuum-sealing helps you avoid inaccurate results from stale or unstable reagents.

Safer Testing.

Instead of handling chemicals and samples, you can reduce exposure significantly with CHEMetrics' self-filling ampoules. Each contains a unit dose of pre-formulated reagent sealed in glass so that direct contact with chemicals is minimized.

Portable, Disposable, & Refillable.

Packaged with everything you need to run 30 tests, CHEMetrics' products are compact and highly portable, making them ideal for fast, dependable analysis in the lab or in the field. When your test is completed, no special disposal is required. And refill packs of 30 ampoules are always available with a single telephone call.

Our Reputation Is Your Greatest Assurance.

CHEMetrics is known for more than quality products. Our reputation is built on customer service. Expert, prompt, and courteous support is always available from our Technical Services and Sales Departments. Our rigorous Quality Assurance Program makes certain that our products perform as you expect them to. Our innovative Research and Development Group continuously develops exciting new products to meet emerging water analysis needs. And we stand 100% behind every aspect of every product and service we provide.

Better water testing is a snap

Dear Analyst,

We at CHEMetrics believe we know what you want from the company that fills your needs for water analysis products — quality, service, and innovation — and we're proud of the reputation we've earned in each of those areas.

Whether it's an instrument, a test kit, an ampoule, or an accessory pack, you can be sure that our quality assurance people have checked meticulously so that the product will perform with the accuracy and dependability you require.

And you can count on getting quick answers—from a live, courteous, and knowledgeable human being—any time you call us with a question for our tech services, order processing, or marketing/sales personnel. They're anxious to work with you to find a solution to your problems.

But of course, we're especially proud of our long-standing record of supplying better, faster, easier ways to perform analyses. Innovation has always been the CHEMetrics hallmark.

Our new catalog has been reformatted to give you all-inclusive and specific product information, itemized by analyte. Kit components, shelf-life, range, instrumentation—everything you need to know—is now presented on one page for easy reference and ordering. Our new price list is shown on a separate insert which will be revised yearly to include new and featured products, as well as the latest instrumentation.

Now in our thirty-fifth year, as always, we are deeply grateful to all our loyal customers for their continuing support, and we look forward to offering you the highest quality, the best service, and a commitment to providing innovative water analysis products and customized solutions to your special testing requirements.

Sincerely,

Gordon A. Rampy, President
CHEMetrics, Inc.
